

Basic Internet Presentation

Your task is to create a presentation explaining to someone who knows very little about the internet and the web. Your presentation should use Google slides and include the following topics. Slide transitions/animations are encouraged.

- History of the web/internet and HTML (keep it brief)
- Differences between Web 1.0, 2.0, and 3.0
- Where/how are websites stored?
- Describe the difference between a markup and a scripting language
- What is internet commerce?
- Internet security and risks

Remember to include your sources!
